When his wife goes missing Conrad desperately searches for her only to realize he may be at ground zero of a far reaching conspiracy that involves corporate murder and engineered pathogens. But is all of this really happening or is it an elaborate and vivid paranoid delusion that only exists in Conrad's fragile tormented mind that has been tragically knocked off balance?

# H1N7 World Health Organization Estimates

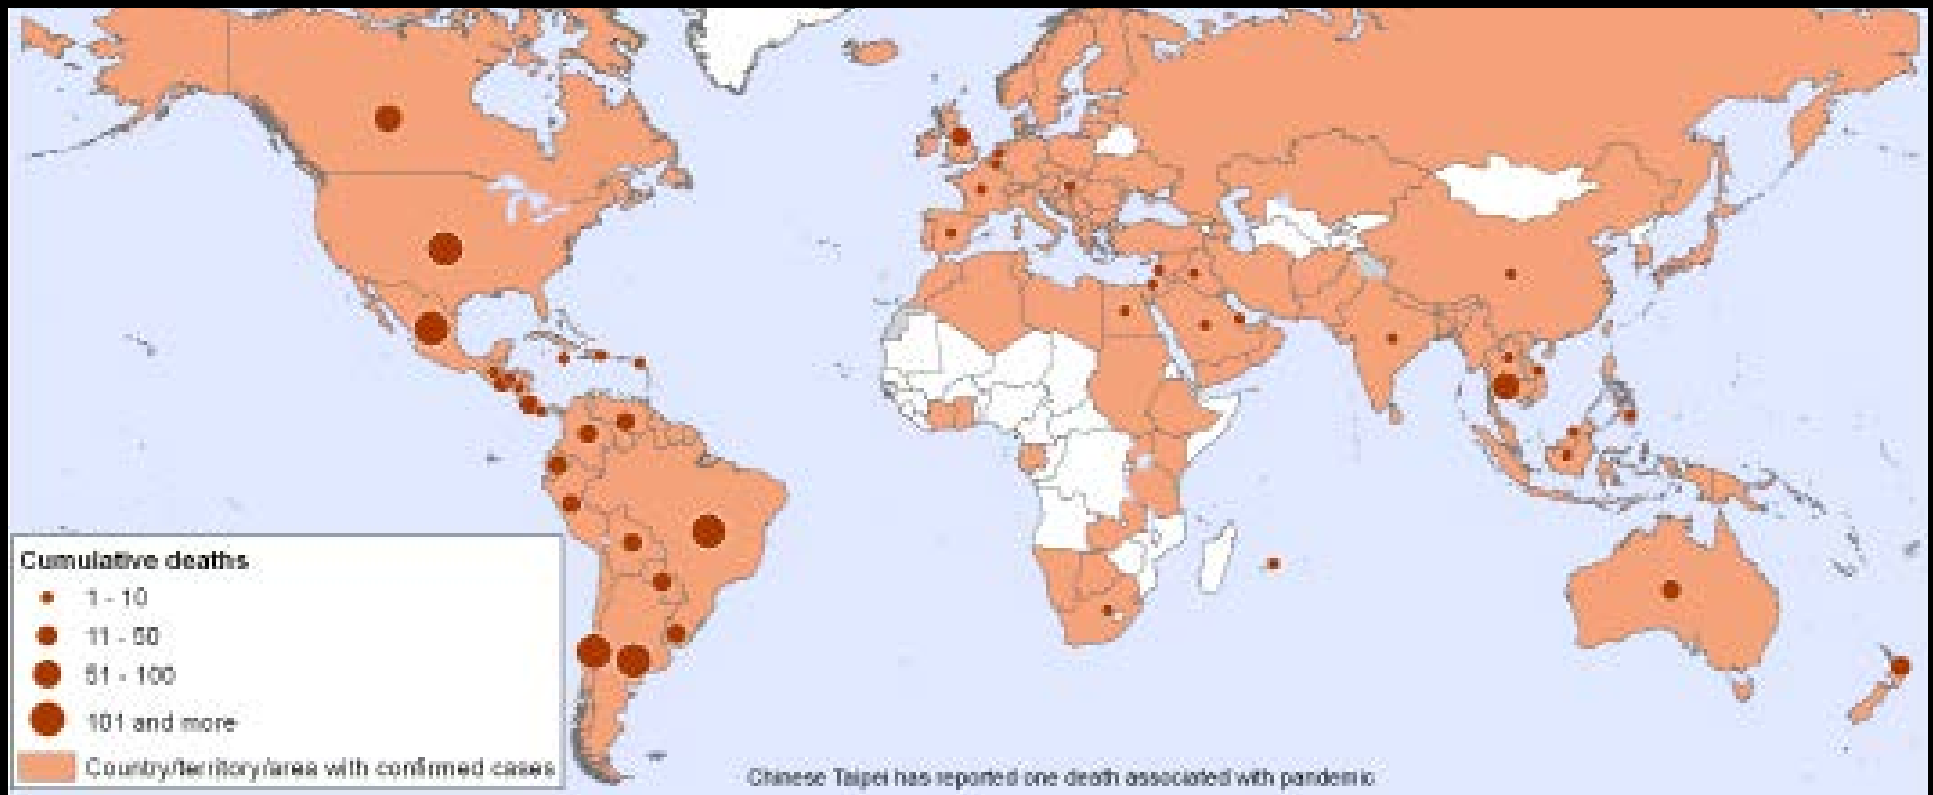

First Reported Case: Mexico City - September 4th 2015

CONFIRMED DEAD to date: 11,392

**PROJECTED DEATH TOLL:** 50,000,000 (in 90 days unless vaccine is created)

H1N7 was first detected in the United States in September 2015. This virus is a unique combination of influenza virus genes never previously identified in either animals or people. The virus contains a combination of genes most closely related to North American swine-lineage H1N1 and Eurasian lineage H5N1 Avian Influenza A viruses.

Various fringe activist groups have made the claim that that the disease could have been created via a human-engineered pathogen. To date these claims are unsubstantiated but have never been debunked by the CDC.

# GEORGIA GUIDESTONES

(Built 1980)

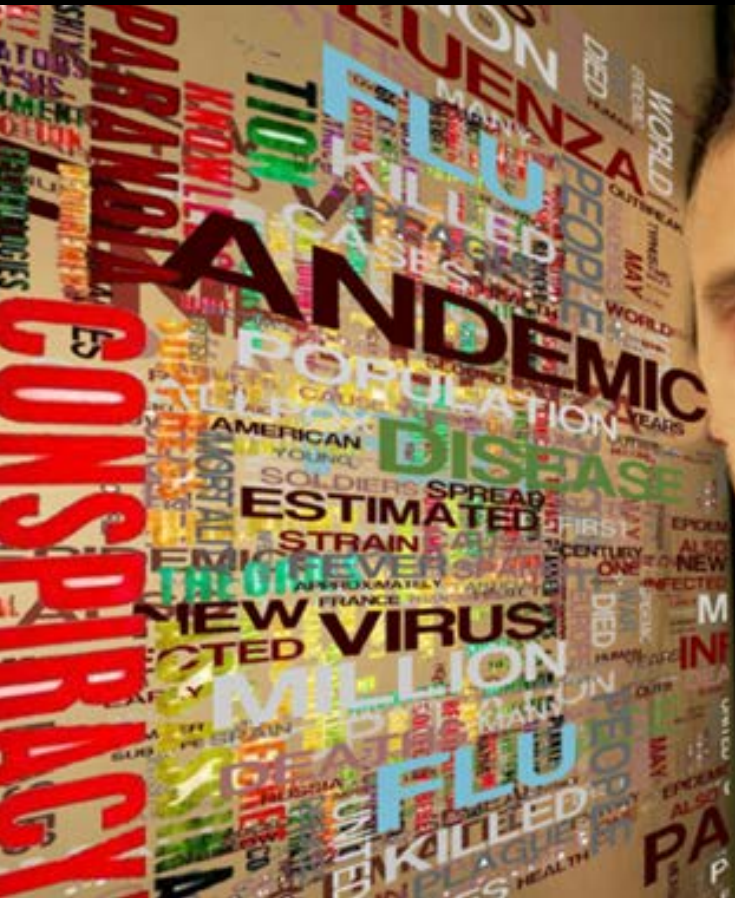

Steeped in bizarre mysticism, the Georgia Guidestones have been part of the landscape in Elberton, Georgia for a quarter of a century. The mysterious monument of unknown origin was purportedly built by an anonymous representative of a secret society called the Rosicrucian Order or Rosicrucians, which call for population levels to be maintained at around 500 million, over a 6.5 billion reduction from current levels.

Several fringe political groups have speculated that H1N7 was a genetically engineered virus created to fulfill the prophecy of the Guidestones.
